

How to setup South College E-mail on iPhone?

You can now setup South College E-mail on iPhone using Active Sync.

The steps are similar for the iPhone, iPod Touch and the iPad. On a device that supports only a single ActiveSync profile, make sure to back up the data on the device before configuring the ActiveSync profile for E-mail access.

Here are the step-by-step instructions:

1. Tap on Settings. Under Settings, click on "Mail, Contacts, Calendar".
2. Tap on "Add Account" in the Accounts page.
3. Tap on "Microsoft Exchange" to configure SouthCollegeTN.edu access.
4. **Enter your full South College email address in both Email and Username fields.** Leave Domain blank. Enter your password. In the Description field, enter a name, e.g SC E-mail.
Please note that you may have to wait a few seconds after step 4 before the 'Server name' field appears.
5. Enter **pod51009.outlook.com** for the Server name.
6. If access succeeds, you will see this page. Select the data to sync. Tap on Save.

1. Click on *Settings*. Under *Settings*, click on "*Mail, Contacts, Calendar*".

2. Click on "*Add Account*" in the *Accounts* page.

3. Click on "*Microsoft Exchange*" to configure Hotmail access.

4. Enter your full Student email address in both *Email* and *Username* fields. Leave *Domain* blank. Enter your *password*. In the *Description* field, enter a name

5. Enter Pod51000.outlook.com

6. If access succeeds, you will see this page. Select the data to sync. Click on Save.
